

AMENDMENTS TO THE SPECIFICATION

The paragraph beginning at page 6, line 3, and ending at page 6, line 7, is amended as follows:

Figures 1 and 2 are schematic block diagrams showing configurations of hardware of a portable cellular phone 14 (shown in Fig. 14) according to an embodiment of the present invention. Figure 1 shows configurations of hardware of the portable cellular phone 14 and Fig. 2 shows configurations of its software.

The paragraph beginning at page 13, line 4, and ending at page 13, line 17, is amended as follows:

In Fig. 7, the mode flag 10 is checked and whether or not the mode flag 10 is one for the type change is judged (Step 301). When it is the mode flag 10 for the type change, the portable cellular phone 14 number information is judged, that is, a comparison between the portable cellular phone 14 information transferred from the data backup PC 15 and a portable cellular phone 14 number of its own portable cellular phone 14 is made and whether or not both the portable cellular phone 14 numbers match each other is judged (Step 302). If both the portable cellular phone telephone numbers 12 numbers do not match each other, processing is terminated and no processing of transferring the Java application 8 is performed. Moreover, at this point, unlike in a case shown in Fig. 6, judgment of the manufacture serial number information 11 is not made.
